

Solar System Science Spinner

1. Print the spinner onto card and cut out. Use a pencil or wooden doweling to create the centre spinner, using blu-tack/tape to secure if necessary.
2. Children take turns to spin the card.
3. Whichever edge it lands on, share as many facts as you can about the subject for up to 60 seconds.

Are you a 60 second scientist?

Making it easier: Play as a group.

Making it harder: Increase the time.
