How to...

Make paper baubles

TOP TIP

- Use a cup or jar as a guide for drawing a circle.

What you need

- Scissors
- Magazines or newspaper
- A pen
- A glue stick
- Sticky tape
- String

3D baubles are simple to make from old magazines and newspapers.

Timing: 45 minutes

1 Cut out 8 magazine squares 12cm x 12cm. Draw a 10cm circle onto one of the squares.

2 Hold the squares together with the circle on top. Cut around the outline to make 8 matching circles. Fold each circle in half.

3 Glue the folded circles in a stack. As you add each section, check the layers don't stick together. Tape a piece of string to the top middle fold.

4 Try making baubles in different shapes and sizes.
