How to...

Make DIY collage cards

TOP TIP

- Collage cut-outs also make great Christmas tags.

What you need

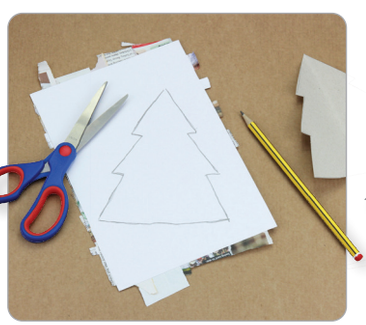
- Magazines or newspapers
- A ruler
- A glue stick
- White card
- Scissors
- A pencil
- Coloured card

Design your own unique Christmas cards with colourful patterns and cut-outs.

Timing: 1 hour

1 Tear some strips from magazines or newspapers. Glue the strips lengthways onto A5 card.

2 Make more newspaper patterns on card using different colour combinations. Try cutting thin strips glued on top of another sheet for a layered effect.



3 Turn the card over, draw a simple Christmas shape then cut it out. You could make a template to draw repeat shapes.

4 Glue the cut-out shapes onto folded background cards. Use leftover pieces to make borders and decorations.
